PROFESSIONAL ACTIVITIES

TEACHING

Primary Instruction (Department of Rehabilitation Science and Technology)

2010 PAS 2104 Genetic and Molecular Mechanisms of Health and Disease, 22 Master of Science in Physician Assistant Studies students, 1 credit

Description: This course introduces the student to the understanding of genetic and molecular medicine as it applies to clinical practice.

2010 – 2018 PAS 2205 Pathophysiology, 40 Master of Science in Physician Assistant Studies students on average, 3 credits

Description: This course examines the biologic basis of common clinical disease states. Pathophysiology is treated as a disruption of normal homeostatic mechanisms that progress beyond the normal compensatory capabilities of the human body.

2010 – 2018 PAS 2201 History Taking and Physical Examination 1/Lab, 40 Master of Science in Physician Assistant Studies students on average, 3 credits

Description: This course introduces the student to the basic interviewing, history taking and documentation skill which will include the chief complaint, history of present illness, past medical, surgical, social, allergy, and family history, review of systems, and medications. Students will learn the clinical significant of the physical examination, the components of the complete physical examinations, and be able to perform these examination techniques.

2010 – 2018 PAS 2301 History Taking and Physical Examination 2/Lab, 40 Master of Science in Physician Assistant Studies students on average, 3 credits

Description: This course introduces the student to the basic interviewing, history taking and documentation skill which will include the chief complaint, history of present illness, past medical, surgical, social, allergy, and family history, review of systems, and medications. Students will learn the clinical significant of the physical examination, the components of the complete physical examinations, and be able to perform these examination techniques.

2012 – 2019 PAS 2104 Genetic and Molecular Mechanisms of Health and Disease, 45 Master of Science in Physician Assistant Studies students on average, 1 credit

Description: This course introduces the student to the understanding of genetic and molecular medicine as it applies to clinical practice.

2019 PAS 2106 Interpreting and Evaluating the Medical Literature, 60 Master of Science in Physician Assistant Studies students, 1 credit

Description: This course introduces the basic concepts, terminology, and methodology of quantitative and qualitative research as it applies to medical practice. This course will stress the knowledge and skills necessary for locating, interpreting, evaluating, and applying quality medical research to clinical practice and professional development; the ability to appropriately critique medical literature; and the basic comprehension needed for participation in research and the development of research and grant proposals.

Primary Instruction (Department of Physician Assistant Studies)

2019 – 2021 PAS 2201 History Taking and Physical Examination 1/Lab, 60 Master of Science in Physician Assistant Studies students on average, 3 credits

Description: This course introduces the student to the basic interviewing, history taking and documentation skill which will include the chief complaint, history of present illness, past medical, surgical, social, allergy, and family history, review of systems, and medications. Students will learn the clinical significant of the physical examination, the components of the complete physical examinations, and be able to perform these examination techniques.

2019 PAS 2301 History Taking and Physical Examination 2/Lab, 60 Master of Science in Physician Assistant Studies students

Description: This course introduces the student to the basic interviewing, history taking and documentation skill which will include the chief complaint, history of present illness, past medical, surgical, social, allergy, and family history, review of systems, and medications. Students will learn the clinical significant of the physical examination, the components of the complete physical examinations, and be able to perform these examination techniques.

2020 – 2021 PAS 2109 Medical Physiology and Pathophysiology, 60 Master of Science in Physician Assistant Studies students, 4 credits

Description: This course integrates the specific characteristics and mechanisms of normal and abnormal functioning of tissues and organs of the human body organized in a systems-based approach. This includes principles of cell and organ physiology, and the disruption of normal homeostatic mechanisms that progresses beyond the compensatory capabilities of the human body.

2023 PAS 2204 Pharmacology 1, 59 Master of Science in Physician Assistant Studies students, 3 credits

Description: This course presents a study of drugs and their interactions with and within living tissue to build the foundation of safe and effective prescribing. This course introduces the student to general drug classifications and pharmacological principles including mechanism of action, indications, dosing, pharmacodynamics, therapeutic parameters, and patient education about commonly prescribed drugs.

Additional Instruction (Department of Rehabilitation Science and Technology)

2010 – 2019 PAS 2202 Clinical Medicine 1/Lab, 40 Master of Science in Physician Assistant Studies students on average, 3 credits

Description: This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses, students will explore the epidemiology, etiology, pathophysiology, assessment, management, and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnosis, and the development and implementation of treatment plans and prognosis.

2010 – 2018 PAS 2302 Clinical Medicine 2/Lab, 40 Master of Science in Physician Assistant Studies students on average, 3 credits

Description: This course continues intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses, students will explore the epidemiology, etiology, pathophysiology, assessment, management, & follow up of disease processes and disorders. The course will approach the condition from the perspective of history & physical examination, ordering & interpreting diagnostic studies, generating differential diagnosis, & development & implementation of treatment plans & prognosis.

Additional Instruction (School of Health and Rehabilitation Sciences)

2011 HRS 2715 Medical Aspects of Disability, 20 undergraduate students, 3 credits

Description: This survey course is designed to prepare rehab professionals to become skillful interpreters and users of medical information concerning various major disabilities and to provide a practical and theoretical understanding of the implications or impact of disabilities on work, education, and independent living. A full range of medical disabilities, including neurological, cognitive, and psychiatric disorders are provided.

2014 – 2020 PT 2040 Survey of Human Disease 1, 65 Doctor of Physical Therapy students on average, 2 credits

Description: A systematic approach to obtaining a pertinent history and identifying patient problems through interviews or other appropriate methods. Includes the recognition of signs and symptoms of systemic disease, cardiovascular, respiratory, and neuromusculoskeletal causes of movement dysfunction. The recognition of patient problems that may require other professional attention in addition to that from a physical therapist is emphasized.

2015 – 2020 PT 2045 Survey of Human Disease 2, 55-70 Doctor of Physical Therapy students on average, 2 credits

Description: A systematic approach to obtaining a pertinent history and identifying patient problems through interviews or other appropriate methods. Includes the recognition of signs and symptoms of systemic disease, cardiovascular, respiratory, and neuromusculoskeletal causes of movement dysfunction. The recognition of patient problems that may require other professional attention in addition to that from a physical therapist is emphasized.

2020 REHSCI 1225 Introduction to Rehabilitation Sciences, 60 undergraduate students, 1 credit

Description: This course will introduce students to the criteria on which they will be judged in the graduate school application process and topics related to professionalism. Recommended readings will prepare the student to develop basic skills for reading and interpreting research articles. Various researchers and clinicians from within the University of Pittsburgh and UPMC will be invited to share their research studies and/or clinical experiences and perspectives.

Curriculum Development/Teaching Products/Media Products

1. 2019 – 2022 Lead curriculum developer for the novel University of Pittsburgh Physician Assistant Studies Hybrid Program, including the overall program curriculum, program competencies, syllabi for 27 courses, and submission of an accreditation application explaining the curriculum and how it meets all standards. The program was successfully accredited by the Accreditation Review Commission for the Physician Assistant.
2. 2020 – 2021 Co-lead curriculum developer for the novel Advanced Practice Provider Leadership Certificate Course co-sponsored by the University of Pittsburgh and UPMC. This work included developing the overall curriculum and the development and presentation of several lectures on topics of importance to physician assistants, nurse anesthetists, nurse midwives, and nurse practitioners seeking to advance their administrative leadership skills.
3. 2020 – 2022 Curriculum co-developer of the novel Doctor of Physician Assistant Studies curriculum including the overall program curriculum and competencies with a primary focus on the research and scholarly principles of quality improvement

Doctoral Dissertation/Capstone Committees

1. Michelle Acosta, Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Post-Professional Education of Neurologic Physician Assistants

Dr. Acosta received her DPAS in 2023.

Dr. Acosta is a Director of Advanced Practice for the University of Pittsburgh Department of Neurological Surgery, Pittsburgh, PA.

2. Brianna Leahey, Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Assessing the Impact of Burnout on Improved Antibiotic Stewardship in Urgent Care Through Increased Provider Education

Dr. Leahey received her DPAS in 2023.

Dr. Leahey is a physician assistant specializing in Trauma Surgery for the Department of Surgery/Trauma Services at UPMC Altoona, Altoona, PA.

3. Rosa Fannie, Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Improving Professionalism Competency in Clinical Year Physician Assistant Students through the use of an Online Module

Dr. Fannie received her DPAS in 2023.

Dr. Fannie is Assistant Professor of Physician Assistant Studies, University of Pittsburgh, Pittsburgh, PA.

4. Heather Snyder, Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Barriers to Documentation of Obesity

Dr. Snyder received her DPAS in 2023.

Dr. Snyder is a physician assistant specializing in Family Medicine for UPMC in Franklin, PA.

5. Erica Murray, Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Assessing the Impact of Burnout on Improved Antibiotic Stewardship in Urgent Care Through Increased Provider Education

Dr. Murray received her DPAS in 2023.

Dr. Murray is the Medical Director of the Waterfront Urgent Care practice in Morgantown, WV.

6. Linda Bizzak Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Improving Professionalism Competency in Clinical Year Physician Assistant Students through the use of an Online Module

Dr. Bizzak received her DPAS in 2023.

Dr. Bizzak is Adjunct Assistant Professor of Physician Assistant Studies, University of Pittsburgh, Pittsburgh, PA.

7. Aimee Smith-Pirollo, Doctor of Physician Assistant Studies Student, University of Pittsburgh School of Health and Rehabilitation Sciences

Title: Emergency Medicine APP Ultrasound Guided IV Insertion Training for Patients with Difficult IV Access

Dr. Smith-Pirollo received her DPAS in 2023.

Dr. Smith-Pirollo is the lead advanced practice provider for the University of Pittsburgh Department of Emergency Medicine at UPMC Magee-Womens Hospital in Pittsburgh, PA.

8. Susan Graff, Doctor of Education Student, University of Pittsburgh School of Education

Title: Equitable admissions in a physician assistant program: Redefining merit for the 21st century medical provider

Dr. Graff received her EdD in 2024.

Dr. Graff is Assistant Professor of Physician Assistant Studies and Director of the Physician Assistant Studies Program, University of Pittsburgh, Pittsburgh, PA.

Bachelor of Philosophy Thesis Committee

1. Rachel Milke, Bachelor of Philosophy in Rehabilitation Science Student, School of Health and Rehabilitation Sciences

Thesis Title: “Impact of resource availability on opioid use disorder treatment outcomes in women: a literature review”

Rachel Milke received her BPhil Rehabilitation Science in 2023.

Rachel Milke is working as a Patient Care Technician at UPMC St. Margaret Hospital, Pittsburgh, PA, as she prepares to enter medical school.

Mentoring

1. 2019 – 2023: Mentor in PA Education, Higher Education Administration, and Research/Scholarly Activity; Christine Rodgers, Assistant Professor and Director of the Physician Assistant Studies Hybrid Program, Department of Physician Assistant Studies, School of Health and Rehabilitation Sciences, University of Pittsburgh
2. 2020 – Present: Mentor in Instructional Design, Course Development, Quality Analysis and Improvement of Academic Programming, Higher Education Administration, and Research/Scholarly Activity; Amy Haller, Director of the UPMC Center for Advanced Practice Education and Adjunct Assistant Professor, Department of Physician Assistant Studies, School of Health and Rehabilitation Sciences, University of Pittsburgh
3. 2021 – Present: Mentor in PA Education, Higher Education Administration, and Research/Scholarly Activity; Christina Davis, Assistant Professor and Interim Chair, Department of Physician Assistant Studies, School of Health and Rehabilitation Sciences, University of Pittsburgh
4. 2021 – Present: Mentor in PA Education, Higher Education Administration, Community-Based Programming, and Research/Scholarly Activity; Kathryn Reed, Assistant Professor and Vice Chair for Equity, Inclusion, and Community Engagement, Department of Physician Assistant Studies, School of Health and Rehabilitation Sciences, University of Pittsburgh
5. 2022 – Present: Mentor in Higher Education Administration; Trisha Cousins, Assistant Professor and Director of the Dietitian Nutritionist Program, Department of Sports Medicine and Nutrition, School of Health and Rehabilitation Sciences, University of Pittsburgh
